*Also available in other packagings, volumes and drive-away-time variations

Tailgate Chair Pod For VW T5 & T6

Through our experiences with previous versions of the Chair Pod, we have improved our design. Rather than a canvas fabric bag, the new and improved Chair Pod is now a vacuum formed plastic container which will comfortably fit two Vanshades branded camping chairs.

WARRANTY

The box takes up as little as 110mm at the rear of the vehicle and features a magnetic lid and rubber live hinge for ease of storage and access, we have formed the product in light grey plastic to match the VW trims on the pillars of the Transporter. The Chair Pod can be fully installed in as little as 10 minutes.

VanShades WindowPod

Blind and thermal Systems from Vanshades

The Vanshades Original Window Pod® systems are focusing on the window conversion of VW T5 T6 with blinds and thermal systems.

Original Window Pod®

This VW T5 and T6 window blinds system is an easy to install, pre-assembled blind and frame system, which offers stylish privacy for all windows of your VW T5 or T6 Campervan.

A tasteful alternative to curtains, Window Pods® achieve a flawless modern finish to your windows and conversion whilst offering blackout and thermal qualities. Available in both Pleated/Blackout and Thermal-Cellular/Blackout types, our easy to install Window Pod® system is suitable for use at conversion stage, or to retro fit to existing conversions.

Cellular Thermal/Blackout Features :
The foil lined cellular pleated structure of our thermal blinds have been created to give a modern sleek look.

The cellular design holds a layer of air which acts as an insulator, retaining heat in the winter and keeping your vehicle cool in the summer. For long and short wheel base, carpeted or plain, for aftermarket glass or factory original.

Options Available

Duo: The Duo blind is a durable pleated mesh fly screen that is fixed into the Window Pod®, along with your thermal blackout blind.

The Duo is located at the bottom of the frame and can be operated independently of each other.

The Duo screen is black in colour and like the blind it is completely out of sight when not in use.
